

In Franklin County 10 species of bats were recorded in 2012 over the summer

Red bat (*Lasiurus borealis*)
Northern long eared bat (*Myotis septentrionalis*)
Indiana bat (*Myotis sodalis*)
Little brown bat (*Myotis lucifugus*)
Eastern pipistrelle (*Pipistrellus subflavus*)
Big brown bat (*Eptesicus fuscus*)
Gray bat (*Myotis grisescens*)
Mexican free tail bat (*Tadarida brasiliensis*)
Hoary bat (*Lasiurus cinereus*)
Silver hair bat (*Lasionycteris noctivagans*)

Only two of these species were found at Shaw Nature Reserve during this survey

Red bat (*Lasiurus borealis*)
Eastern pipistrelle (*Pipistrellus subflavus*)

We hope to discover more bat species at Shaw Nature Reserve in the future. For more information about Missouri bats visit:
