

F U N D A C I Ó N

**Jardín Botánico de Cali**

I come from a country  
where all colors are green!

Why are we  
environmental  
interpreters?

Because possibilities allow us to transform perceptions and realities... Since they let us dream.

What are we interpreting?

*Fotografia Evelyn Barona Osorio*

Throughout this journey we have learned that behind every plant there is a story, a myth, a rythm, and behind every forest there is a magical creature...

Therefore...  
Our proposal for  
environmental  
interpretation,  
had many  
challenges...

1. Encourage the people of Cali to recognize and value the biological diversity and cultural aspects that our territory owns...

2. Be seductive yet  
at the same time  
allow the dynamic  
of our forest to be  
understood...

3. Strengthen  
our identity  
with the  
native flora...

Transform  
cultural  
practices...

FOTOGRAFÍA *Evelyn Barona Osorio*

But over all  
have lots of  
fun!!!

# EXPLORACIÓN BOTÁNICA

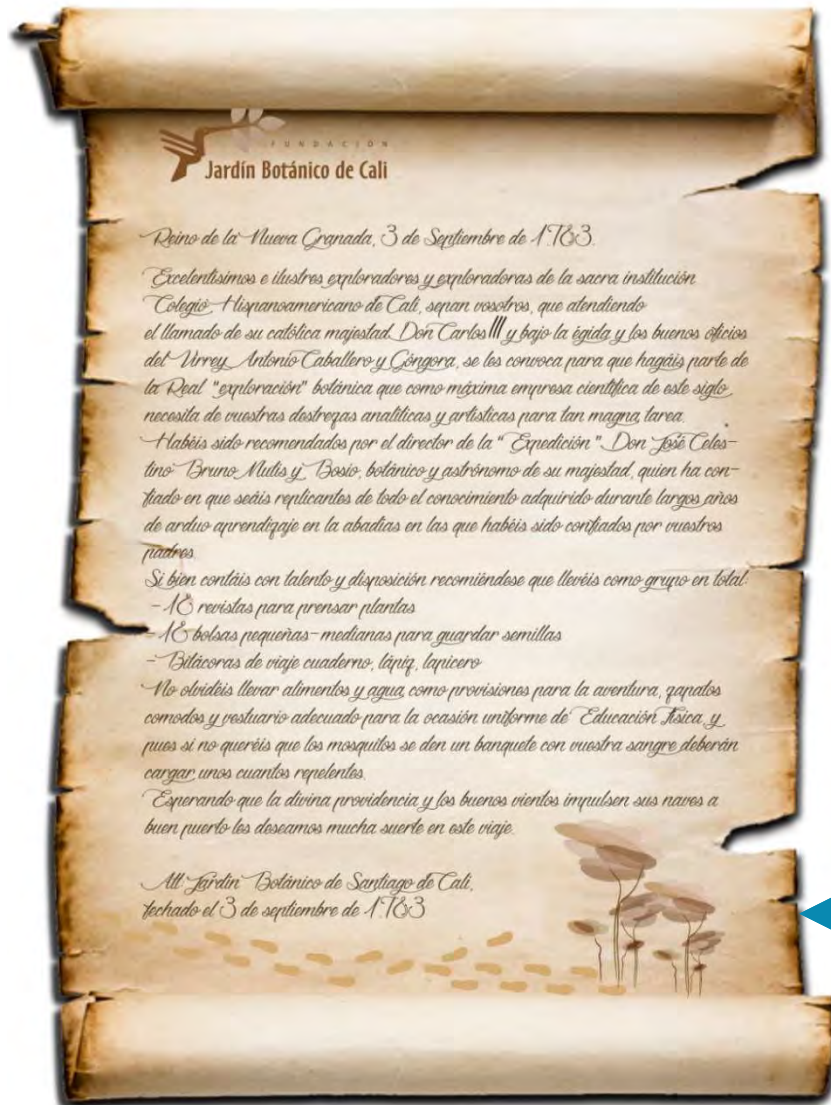

Our journey begins through time...

Celestino Mutis encourage the children to continue his mission of enquiring into, comprehending, and record the treasures that our Tropical Dry Forest beholds...

This letter has been sent to prepare them for the experience.

# THE TREASURES OF THE TROPICAL DRY FOREST

Trash does not exist

Diversity is the key

Teamwork

It's always time to plant

The smallest dominate

Fertility with no fertilizers

Preserving water

A task for everyone

The experience is guided by an environmental interpreter, who represents the meaning of knowing our past to act in the present.
