

**Instructions:**

1. Use the ¼ inch graph paper supplied here to draw a to-scale map of the area you propose to plant for RainScaping. You may use more than one piece of graph paper if necessary. Refer to the Missouri Botanical Garden RainScaping Guide for ideas of different landscape features you can incorporate for RainScaping. Please put your name and address in one of the corners of the map.
2. Refer to the key below and indicate on your map where all existing features are. Note proposed plants with the number corresponding to the number indicated on your plant list.
3. Refer to the key below and indicate on your map where proposed rainscaping landscape features are to be installed.

---

**Key:**

	Scale of map
	Orientation of property to north
	House and other buildings
	Above ground utility lines
	Below ground utilities (call 1 800-DIG-RITE for locations)
	Downspout on house and other buildings
	Indicate slope
	Existing tree (make circle to scale with the diameter fo the tree)
	Proposed tree to be planted
	Existing shrub
	Proposed shrub to be planted
	Existing herbaceous planting (ground covers, perennials, prairie garden, etc.)
	Proposed herbaceous planting (ground covers, perennials, prairie garden, etc.)
	Location of percolation test if installing a rain garden
	Proposed outline of rain garden and/or bioswale
	Underground pipe (to direct water to rain garden and/or bioswale)
