

Thinking Beyond the 3R's

A Recycling Workshop for K-12 Educators

Sat., October 22nd

\$20 per educator; lunch provided

9 a.m. to 4 p.m.

Missouri Botanical Garden | Plant Lab

4344 Shaw Blvd., St. Louis MO 63110

This low-cost workshop provides educators from around the region with the resources, tools, and knowledge they need to successfully integrate solid-waste related topics such as recycling, composting, household hazardous waste, and waste in their classrooms. With this information, educators can help guide students to create changes and reduce waste in the classroom, at their school, and throughout the community.

The “Thinking Beyond the 3R’s” workshop was developed to assist educators in curriculum support, implementing special projects, and creating behavioral changes that promote wise resource use in schools throughout the greater St. Louis region. We encourage educators from all learning environments and grade-levels to attend.

Learn how to:

- Improve the teaching, learning and integration of solid waste topics in classrooms; expanding content already covered in our schools, empowering student change-makers, and reducing waste generated in our schools.
- Encourage students to be environmental stewards and active citizens in addressing real-world problems such as waste and recycling.
- Develop problem-solving and critical thinking skills while learning to plan, implement, and evaluate projects.
- Understand the relationship between sustainability and waste.
