

MOSQUITO BUCKET OF DOOM

Cost effective way to target mosquitoes before they grow up and fly

What You Need

- Dark-colored bucket (half-filled with water)
- Handful of grass
- Stick (for escape ramp & egg-laying surface)
- Bti dunk (safe for humans, pets, and wildlife)
- Optional: chicken wire cover

How It Works

- Grass releases carbon dioxide → attracts mosquitoes.
- Mosquitoes lay eggs in/near the water.
- Bti kills larvae before they become biting adults.

Setup Instructions

- Fill bucket halfway with water.
- Add grass, stick, and 1/4 Bti dunk
- Place in shaded, low-wind area away from where people gather.
- Replace Bti monthly.

Safety & Tips

- Bti is safe for humans, pets, and pollinators.
- Use only one source of standing water (the bucket).
- Keep bucket at least a few meters from seating areas.
