By DEAN E. MURPHY

After eight months in Flushing, Queens, squeezing, shaking, sniffing and tasting, Erin H. Moriarty has learned a few things about the zones and other plant life that draw shoppers from across New York to the end of the 47th Street train.

First, yuck. "Some of this stuff is scary," Ms. Moriarty said. Grass jelly drink comes to mind.

F1 here are some very nice

Queens Botanical Garden invites you to **Gardening Day**
 an afternoon of how-to talks and demonstrations designed to get your garden growing

Free **Saturday, April 17, 1999**
 12 noon to 5 pm

Highlights include:

- 1 pm Growing Orchids for Your Home**
 Yong Dae and Hyun Jung (Michelle) Kim, Owners, Orchid Land, Flushing
- 3 pm Important Korean Plants in American Gardens**
 Kunso Kim, Curator of Botanical Collections, Morton Arboretum, Lisle, IL

These talks will be presented in both English and Korean. A schedule of the day's events will be available in English, Korean, Chinese, and Spanish.

Plus, "Pots and Plants" and other Just for Kids! programs for ages 3 to 12, floral crafts, tips on rose care, pruning, herb gardening, and more! Bag your own free compost and purchase a Garden Gourmet Compost Bin for only \$20!

Gardening Day is made possible, in part, by Bell Atlantic, The Chase Manhattan Bank, Lisa Kim, NYC Department of Sanitation, New York State Senator Serphin R. Maltese, New York State Assembly, and Target Stores.

Queens Botanical Garden invites you to **Gardening Day**
 an afternoon of how-to talks and demonstrations designed to get your garden growing

Sunday, April 19
 12 noon to 5 pm **Free**

Highlights include:

- 12 noon Getting Started: Advice for the Novice Gardener**
 Marianne Kristoff, QBG Horticulturist
- 1 pm Caring for Your Roses**
 Margaret Reis, Treasurer, Queens Rose Society
- 2 pm Urban Aquatic Gardening**
 Scott D. Appell, Director of Education, The Horticultural Society of New York
- 3 pm The Art of Flower Arranging**
 Italo Cárdenas, Director, Artes y Flores
- 4 pm Intensive Vegetable Gardening for Terrace and Yard**
 Phil Tietz, Associate Director, Green Guerrillas

Plus "Leave It on the Lawn" activities with the Queens Greening Compost Team, advice from The Plant Doctor, the buzz on bees, and more!

Just for Kids! Special planting activities and workshops for ages 3 and up will take place in the Children's Garden throughout the afternoon.

Jardín Botánico de Queens le invita a **Día de Jardinería**
 una tarde de charlas y demostraciones diseñadas para hacer crecer a su jardín

Domingo, 19 de abril
 de 12 m a 5 pm **Gratis**

Se destacan demostraciones que incluyen:

- 12 m Empezando: Consejos para los jardineros principiantes**
 Marianne Kristoff, Horticultora del Jardín Botánico de Queens
- 1 pm Cuidando sus Rosas**
 Margaret Reis, Tesorero, Sociedad de las Rosas de Queens
- 2 pm Jardinería Acuática Urbana**
 Scott D. Appell, Director de Educación, Sociedad de Horticultura de Nueva York
- 3 pm El Arte del Arreglo Floral**
 Italo Cárdenas, Director, Artes y Flores
- 4 pm Jardinería Intensiva de Vegetales para terrazas y patios**
 Phil Tietz, Director Asociado, Guerrillas Verdes

Otras actividades, "Déjelo en el Terreno" actividades con el Equipo de Abono de Queens, consejos del Doctor de las Plantas, el zumbido en las abejas, y más!

Solamente para los Niños! Durante toda la tarde, en el Jardín de los Niños, actividades y talleres de plantación para niños mayores de 3 años.

Celebrating Water!

Gathering By Water

Three large interpretive panels, translated into Chinese, Korean, and Spanish, discuss how our new Visitor & Administration Center conserves and cleanses water.

Gathering, cleansing, splashing.
Celebrate water as people do all over the world.

A FOUNTAIN OF LIFE

The water that splashes from this fountain today fell as rain not long ago. We've made a special rainwater harvest system that captures the rain, cleans, stores, and circulates it.

Just like streams in nature, when there's lots of rain, water flows from this fountain. But when there's little or no rain, like in a drought, our fountain and the streams around it may run dry.

Many cultures regard a source of water as sacred and protect it. Water is essential to life. As you walk through the Garden today, think about how important water is to your life.

Rainwater harvest system

Yan An Park

生命之泉

收集、澆灌、澆灌。
讓我們像世界各地的人一樣慶祝水。

今天從這個噴泉噴出的水，不久之前還是雨水。
我們設計了一個特殊的雨水收集系統，用來收集雨水，
並將其淨化、儲存及循環。

就像大自然中的河流一樣，我們下雨時，水就會從這個
噴泉中湧出。但當天下雨或雨下得很少時，比如乾旱時，
我們的噴泉和它周圍的溪流就會變得很乾。

許多文化都將水源視為神聖之物並加以保護。水是生命
必不可少的。當你今天在花園裡散步時，請想想水對於你的生活
有多重要。

Una fuente de vida

Recoger, limpiar y regar. Celebramos el agua como la hace
toda la gente en el mundo.

No hace mucho tiempo, el agua que brota de esta fuente caía en
forma de lluvia. Creamos un sistema especial de recolección de
agua que captura el agua de la lluvia, la limpia, la almacena y la
hace circular.

A igual que en los arroyos naturales, el agua brota de esta fuente
cuando llueve mucho. Pero cuando llueve poco o nada, como en
épocas de sequía, nuestra fuente y los arroyos se secan y se
quedan secos.

En muchas culturas, las fuentes de agua se consideran sagradas
y están protegidas. El agua es esencial para la vida. Mientras
recorres el Jardín el día de hoy, piensa en lo importante que es el
agua en tu vida.

살의 원천

모으고, 깨끗하게 하며, 물병을 채워주세요.
전 세계 곳곳에서 사람들이 기념으로 물을 기념하십시오.

오늘 이 분수대에서 솟아 나온 물은 지난 장마 전에 비로 내렸던
바로 그 물입니다. 저희는 빗물을 빗막, 강우, 차우,
빗 수집시키는 특수한 정수시스템을 개발
했습니다.

자연의 흐름은 시간과 함께, 강우량이 많으면 물이 이
분수대로부터 솟아나 흐르게 됩니다. 그러나 가뭄처럼
강우량이 적거나 없는 경우에는, 저희의 샘과 주변의
시냇물이 마를 가능성이 있습니다.

많은 문화를 형성시키고 보호하는 물은 매우 중요하며, 물은
우리의 삶에 필수불가결한 것입니다. 오늘 여러분은 정원을
거닐며 자신의 삶에 물이 얼마나 소중한 것인지를 보고
같이 생각해보시기 바랍니다.

Water re-circulating

A BUILDING THAT WORKS WITH NATURE

Three working roofs

- Solar roof produces electricity from sunlight with photovoltaic panels
- Canopy roof captures and celebrates rainfall
- Green roof absorbs storm water and helps insulate the building

Imagine a building as elegant and efficient as a flower!

Our Visitor & Administration Center collects and celebrates rain falling from the sky and transforms sunshine into electricity. It captures natural light and gentle breezes, and is warmed by heat stored in the earth. Materials on the inside and outside have been harvested responsibly and produced locally. They are recycled and nontoxic, keeping people and the planet healthy.

The surrounding landscapes work with the building to cleanse used water so it can be recycled. They keep polluted storm water from entering local waterways. And they are full of beautiful native plants, bringing wildlife habitat and biodiversity back to the city.

Traditional buildings worldwide have been made of local materials and designed for the local climate. These age-old techniques and cutting-edge technologies work together in our Visitor & Administration Center.

Right: Houses in Indonesia's wet tropical climate are built on stilts to stay high and dry. Dheera Venkatraman Far right: Thick adobe walls in Iran's desert climate keep buildings cool during the day and warm at night. F. Dany

和自然合作的建築

想像一株鮮花般優美和高效率的建築！

我們的訪客及行政中心讚美和收集來自天上的雨水，並且把陽光轉變成電力。它吸收自然光與輕風，還用泥土裏儲存的熱能取暖。建築內外使用的材料都是本地生產和用負責任的方法收割，它們不含毒素和可以循環再用，保障了人類和地球的健康。

四周的園林和建築物一起把用過的水潔淨以便循環再用。它們防止廢污水進入本地水道，還透過栽種大量美麗的本土植物，為野生動物提供棲息地，也為城市提供更多樣的生態環境。

Un edificio que trabaja con la naturaleza

¡Imagínese un edificio tan elegante y eficaz como una flor!

Nuestro Centro de visitas y administración recoge y celebra la lluvia que se precipita del cielo y transforma a la luz del sol en electricidad. Atrapa la luz natural y las suaves brisas y se caldea con el calor almacenado en la tierra. Los materiales internos y externos han sido cosechados con responsabilidad y producidos localmente. Han sido reciclados y no son tóxicos, manteniendo saludables tanto a la población como al planeta.

Los paisajes circundantes colaboran con el edificio en la purificación del agua usada para que pueda ser reciclada. Evitan que el agua contaminada de las tormentas confluya a los sistemas locales de irrigación. Y están repletos de hermosas plantas autóctonas, trayendo a la ciudad el hábitat de fauna y flora, así como la biodiversidad.

자연과 공조하는 건물

꽃처럼 우아하고 효율적인 건물을 상상해 보세요!

저희 방문자 및 관리 센터(Visitor & Administration Center)는 하늘에서 내리는 비를 모으고 축하하며 햇빛을 전기로 변환합니다. 이 건물은 자연광과 산들바람을 모으며, 땅에 축적된 열로 난방을 합니다. 건물 내외장재는 책임감 있게 수집했고 현지 생산되었습니다. 이러한 자재들은 재활용되었고 비독성이므로, 사람과 지구를 건강하게 보호합니다.

주변 조경은 빌딩과 공조하여 재환율을 위해 사용한 물을 정화합니다. 이 조경은 오염된 빗물이 지역 수로에 진입하는 것을 방지합니다. 또한 아름다운 자연 식물로 가득 차 있어, 야생 동물과 생물다양성을 도시로 불러 드립니다.

The Queens Botanical Garden, an independent, not-for-profit institution located on City-owned land, is presented by a volunteer board of trustees. It is partially supported by public funds through the New York City Department of Cultural Affairs, the Zoo, Botanical Systems, and Aquatics Grant Program of the New York State Office of Parks, Recreation, and Historic Preservation; the Queens Borough President's Office; the New York City Council; and the New York State Legislature. Additional support through private sources includes contributions from corporations, foundations, and individuals. Interpretive signage and exhibits are sponsored in part by the Institute of Museum and Library Services Interagency Community Foundation. Consulted Editors: Dr. Alan R. Lomax, Inc., New York State Community Capital Assistance Program, New York State Council on the Arts, New York City Environmental Foundation, New York State Thruway Authority, The John Jay College of Criminal Justice, The Lincoln Center Foundation, The MacArthur Society, The Rockefeller Foundation, and The Wildlife Conservation Society.

GREENJOBS Training Program

The Green Jobs Training Program is a free program that trains unemployed and underemployed New Yorkers for careers in Waste Management, Sustainable Landscape Design & Maintenance, and Green Cleaning & Housekeeping. The program helps participants develop job readiness skills, prepares them to apply for green jobs, and connects them with employers and companies that have or want to develop a green focus.

People

Audience: unemployed and underemployed New Yorkers.

Strategy

- Thorough screening and recruitment process
- Hands-on, intensive 2-week program
- Job readiness workshops
- Job placement assistance
- Employer partnerships

Content

We use Real-Time Labor Market Information to align our curriculum with industry needs.

- Green Cleaning & Housekeeping
- Waste Management
- Sustainable Landscape Design & Maintenance
- OSHA or Customer Service

Results

63% Job Placement Rate
94% Retention Rate
367 People Trained
218 Employed

CHARLES H. PERKINS MEMORIAL ROSE GARDEN AND AGRS™ TRIAL SITE

Garden Joy rose cultivar
Photo by H. David Stein

查理·H·珀金斯紀念玫瑰園和AGRS™測試 網站

在1939年紐約世界博覽會上，傑克遜和珀金斯的“現代玫瑰展”特別展出了當時最新和最棒的現代玫瑰。

皇后區植物園的藏品中展出許多經典和著名的玫瑰品種，如混合茶、多花寶蓮、花束寶蓮、大花寶蓮、灌木和老花叢玫瑰。其中還包括生命力頑強的現代玫瑰，她們的水分和養分需求低，同時抗病蟲能力強。植物園還舉辦由美國花園玫瑰選拔™ (AGRS™) 領導的測試新玫瑰的試驗。這些試驗評估在幾種不同地區的新品種的各種特性，並給最佳品種授予獎勵。

類似的試驗有助於培養玫瑰栽培和馴化的悠久歷史。你也許可能發現過在森林或林地邊緣的野玫瑰。野玫瑰每朵只有五瓣花瓣，然而牠們的品種有非常多的花瓣，這給予了人們難以言喻的豐滿外觀。玫瑰的果實富含維他命C，被譽為“寶藏漿”，並被廣泛用來製作果醬和茶。

玫瑰在許多文化中與特殊意義。在西方文化中，玫瑰是作為愛情的象徵。玫瑰是皇后區的代表花之一，她在皇后區區旗上象徵著早期的英國移民。

The 1939 New York World's Fair "Parade of Modern Roses" exhibition by Jackson and Perkins featured the latest and best of modern roses.

QBG's collections exhibit many classical and well-known varieties such as hybrid tea, polyantha, floribunda, grandiflora, shrub, and old garden roses. They also include modern, sustainable roses that have lower water and nutrient needs while displaying an increased disease and insect resistance. The Garden also hosts trials led by American Garden Rose Selections™ (AGRS™) to test new roses. These trials evaluate newly introduced cultivars in different regions of the United States for a variety of desired characteristics and bestow awards on the best ones.

Trials like this one aid in continuing the long history of cultivation and domestication of roses from the wild roses you may have seen in the woods or along woodland edges. Wild roses have just five petals on each flower, whereas cultivated varieties have many petals, giving them the fuller appearance we are accustomed to. The fruit of the rose, high in vitamin C, is called a "hip" and is used to make jelly and tea.

Roses hold special significance in many cultures. In Western culture, the rose is presented as a token of love. The rose is one of the flowers of Queens and represents the English settlers on the borough's flag.

PRUEBA DE CHARLES H. PERKINS CONMEMORATIVO JARDIN ROSAS Y AGRS™ SITIO

La Feria Mundial de Nueva York de 1934 "Desfile de las Rosas Modernas" exposición de Jackson y Perkins presenta la más última y mejor de las rosas modernas.

Colecciones de QBG exhiben muchas variedades clásicas y bien conocidas, tales como el té híbrido, polyantha, floribunda, grandiflora, arbustos y rosas viejas del jardín. También incluyen rosas modernas y sostenibles que necesitan menos agua y nutrientes mientras demuestran un aumento en la resistencia a enfermedades e insectos. El jardín presenta ensayos llevados por American Garden Rose Selections™ (AGRS™) para probar nuevas rosas. Estos ensayos evalúan recién introducidos cultivares en diferentes regiones de los Estados Unidos para una variedad de características deseadas y los mejores reciben premios.

Ensayos como este ayudan en la continuación de la larga historia de cultivo y domesticación de las rosas de las rosas silvestres que puedes haber visto en el bosque o en los bordes del bosque. Rosas silvestres tienen sólo cinco pétalos en cada flor, mientras que las variedades cultivadas tienen muchos pétalos, dándoles el aspecto más completo que estamos acostumbrados. El fruto de la rosa, rico en Vitamina C, se llama un "hip" y se utiliza para hacer mermelada y té.

Rosas tienen un significado especial en muchas culturas. En la cultura occidental, la rosa se presenta como una muestra de amor. La rosa es una de las flores de Queens y representa a los colonos ingleses en la bandera de la ciudad.

Charles H. Perkins 기념 장미 정원 및 AGRS™ 테스트 사이트

1939 뉴욕 세계 박람회 전시회 퍼킨스여 의해 전시 "현대 장미 퍼레이드"는 현대 장미의 최신과 최고의 기능을 갖춘.

QBG의 컬렉션은 하이브리드 차, 폴란타, floribunda, grandiflora, 나무, 오래된 정원 장미로 많은 고전 잘 알려진 품종을 나타낸다. 그들은 또한 물과 영양과 적은 자원들을 표시하는 동안 낮은 물과 양분의 요구가 현대, 지속 가능한 장미를 포함한다. 정원은 새로운 장미를 테스트하는 미국의 가든 로즈 선택™ (AGRS™)에 의해 주도 임상 시험을 개최합니다. 이 시험은 새로 원하는 특성의 다양한 미국의 다른 지역에서 품종을 도입하여 최고의 것들이 있을 수여 평가합니다.

당신이 숲이나 숲 가장자리를 따라 볼지도 모른다 야생 장미에서 오래 장미의 순화의 오랜 역사를 계속의 일 원조 중 시험. 때때 품종은 그들이게 수리가 익숙한 품종 모양을주는 많은 꽃잎을 가지고 만일. 야생 장미, 각각의 꽃에 원래 5 꽃잎이었다. 비타민 C의 높은 장미의 열매는, "일명"이라고하며 젤리와 차를 만드는 데 사용됩니다.

장미는 많은 문화에서 특별한 의미를 지닙니다. 서양 문화에서 장미는 사랑의 로스로 제시됩니다 장미 아홉의 꽃 중 하나입니다 및 자치구의 국기에 영어 정복을 나타냅니다.
