Sketch your own glass artwork piece.

Poetry
Create a poem where you take on the persona of the artist’s representation in the glass artwork. Reflect on the piece’s relationships and location and use good descriptive words, similes and metaphors to help create a vivid picture of the piece in the reader’s mind.

Abstract Art

Abstract art uses visual language of shape, form, color and line to create a composition which may exist with a degree of independence from visual references in the world. Many of the glass pieces seen today are colorful and sculptural forms that represent the natural environment.

How is the artist depicting movement? | What is the natural form of movement?

Transparent, Translucent, Opaque

Locate examples of transparent (see-through), translucent (limited light passes through) and opaque (no light passes through) glass and describe the shape of the glass displaying the different levels of light transmission.

Making Inferences

To make colored glass, a recipe is used by adding metal oxides to the glass. The following oxides produce the following colors:

- **Copper** .................. Blue, Green, Red
- **Manganese Dioxide** ................. Purple
- **Chromic Oxide** ............... Emerald Green
- **Selenium Oxide** ......................... Reds
- **Cobalt Oxide** ......................... Blue
- **Gold Chloride** ......................... Ruby Red
- **Cadmium Sulfide** ................. Yellow
- **Iron Oxide** ................. Greens and Browns

While looking at a piece of the glass artwork, hypothesis which metal oxides were added to the glass to make its color.

<table>
<thead>
<tr>
<th>Name of piece:</th>
<th>Metal oxides used:</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
</tr>
</tbody>
</table>

To create the different tints seen, particular metal oxides had to be used in different amounts.

Principles of Design

The 12 principles of design describe the ways that artists use the elements of art in a work of art. Look for four of the selected principles in a glass pieces and note any trends observed.

**Balance:** to have balance, the elements need to be in scale

**Emphasis:** strategy to get the viewer’s attention to a design element

**Movement:** path the viewer’s eye takes through a composition

**Pattern:** repetition more than one design element

**Repetition:** using repeated elements

**Proportion:** sense of unity created when all the elements in a composition relate well

**Rhythm:** combination of elements when used repeatedly, and

**Unity:** harmony produced by all the elements in a design piece

</thead>
<tbody>
<tr>
<td>1. Describe</td>
<td>What do you see?</td>
</tr>
<tr>
<td>2. Analyze</td>
<td>How is the work organized?</td>
</tr>
<tr>
<td>3. Interpret</td>
<td>What is the artist saying?</td>
</tr>
<tr>
<td>4. Judge</td>
<td>Is this a successful piece of art?</td>
</tr>
</tbody>
</table>

### Reflections

Chihuly's glass is often designed to look like shapes and structures in nature and are said to be biomorphic. What living things would you like to see displayed in future art works?

Which parts of your visit to *Chihuly in the Garden 2023* did you find most interesting?

What questions would you ask Dale Chihuly about his art if he were to answer them?

Describe something you think could be done with glass?

Is there anything else you would like to learn about glass? (share with your teacher if you are comfortable sharing)
4-Step Critical Analysis of Artwork

1. Describe
What do you see?

2. Analyze
How is the work organized?

3. Interpret
What is the artist saying?

4. Judge
Is this a successful piece of art?
